# Md. Arnob Tanvir | Full Stack Developer

arnob0188@gmail.com +880 01853958635 Khilgaon, Dhaka arnob-tanvir-b0122527a tanvir0188

## CAREER OBJECTIVE

Software Engineer with **1+ years of experience** specializing in **Full-Stack development** with **Django REST Framework, Express.js, and Next.js**. Looking to leverage my experience in building scalable systems and developing reliable applications while expanding my expertise in **DevOps, AWS, and cloud technologies**.

## SKILLS

- **Front-end:** Next JS, React JS, HTML, CSS, JavaScript, Tailwind CSS
- **Back-end:** Python(Django), Express JS, Go(Gin), PHP(Laravel),
- **Programming Languages:** TypeScript, JavaScript, Python, Go, PHP, C, C++
- **Database:** PostgreSQL, MySQL, SQLite, MongoDB
- **Version control:** GitHub, GitLab
- **Cloud & Devops:** AWS, Terraform, DigitalOcean, Docker

## PROFESSIONAL EXPERIENCES

**Venture AI**

**Python Executive Developer (Jun 2025 - Present)**

- Built, deployed and maintained backend APIs and real-time systems to support application features
- Gained hands-on experience with AWS, Digital Ocean, Terraform, Docker and GitLab
- Collaborated with different stack of developers and ensured seamless system integrations
- Became employee of the month once
- Delivered 55% more than assigned development targets over 8 months

**Nirman IT**

**Fullstack Developer (Jan 2025 - Jul 2025)**

- Learned building and integrating REST APIs and Web Socket-based systems
- Developed and connected frontend and backend components for real-world applications
- Worked across the full stack, contributing to both client-side and server-side development
- Became employee of the month once
- Learned practical software development workflows in a startup environment

## PROJECTS

**Puremotion:**

**Tech:** Django REST Framework, WebSocket, Docker, Celery, PostgreSQL, Redis, Stripe, VEO API, Cloudinary

**Overview:** Users can upload images, and generate video out of them, basically turning memories into actual videos

- Proper handling of authorization, authentication and social login
- Application Responsiveness improved by 40% by doing the video generation using celery background workers, and task-queuing.
- Real time notification system to notify the status of the requested video
- Seamless stripe payment integration for both subscription and one-time payment
- Implemented Multi-stage docker build to reduce disk usage upto 45%

**Trulee:**

**Tech:** Django REST Framework, Web RTC, Docker, Celery, PostgreSQL, Redis

**Overview:** Users can upload images, and generate video out of them, basically turning memories into actual videos

- Developed real-time AI voice interaction using WebSocket and WebRTC-based communication
- Increased application AI to User interaction flow efficiency up to 30%.
- Implemented a reminder-based notification system using Firebase Cloud Messaging (FCM), with automated scheduling logic to trigger notifications based on user-defined times.

**RentNest:**

**Tech:** NextJs, ExpressJS, Postgre, Prisma

**Overview:** User has three roles, Tenant can make, payments and rental request on property, Landlord can manage the property and rental request, Admin can manage everything

- Proper handling of authorization, authentication, role based access, and social login
- Proper state management using react suspense, and Nextjs loading state

## EDUCATION

**East West University(**B.Sc in Computer Science & Engineering**)** **January 2020 - January 2025**

**Birshreshtha Munshi Abdur Rouf Public College (**HSC**)** **2019**

**Motijheel Govt. Boys High School(**SSC**)** **2017**
